### STAR PUPIL

Anoyolo is one of the youngest children in Teacher Siya's class but he is making the best progress so far this year. He is able to name colours, shapes and numbers better than most of those who are older than him. Keep up the good work, we are very proud of you.

Anoyolo is een van die jongste kinders in Juffrou Siya se klas maar maak die beste vordering die jaar. Hy ken sy kleure, vorms en nommers better as meestal van die ouer kinders. Hou so aan, ons is baie trots op jou.

### NUWE MAATJIES NEW FRIENDS

### Stimulation Tip / Stimulasie Wenk

Hugging, kissing, cuddling and making your child feel secure and being cared for helps develop their brain. You are also making them grow to be socially well-adjusted. The more nurtured, loved, cared for and safe a child feels, the more firmly established their emotional well-being will be. Your child's earliest experiences with you, the parent, shape what is to become of them as an adult. It is their early experience with you that they learn about how to feel and handle their feelings – and this affects their later behaviour and thinking capabilities.

Drukkies, 'n soen, liefde en om jou kind veilig en versorg te laat voel help om hulle brein te ontwikkel. Dit help hulle ook groei om sosiaal goed aan te pas. Hoe meer jy jou kind koester, liefde toon en veilig laat voel hoe meer sal hul emosionele welstand verstewig en gevestig word. Jou kind se ervarings met jou, as ouer/versorger, bepaal wat van hulle sal word as grootmens. Dit is hulle vroeë ervarings met jou wat hulle leer hoe om te voel en hulle gevoelens te hanteer – dit affekteer hulle gedrag en dinkwyse later in die lewe.

"At the end of the day, the most overwhelming key to a child's success is the positive involvement of parents."
